

I am a practicing voter, I also coach my family and the friends who listen to me, which way I think they should vote, and I really do not feel that we should be told we cannot have the services that we are paying for. We enjoy our XM Radio and we want the Bill HR4026 stopped in it's ugly tracks. If the local stations cannot send signals that can keep us informed from a greater distance away from their home areas then why should we suffer because of their inadequate service? The big television networks whined and sniveled and got our satellite coverage reduced by leaps and bounds, lets not allow the radio stations to get away with the same thing. I enjoy listening to the services my XM Radio provides from all locations across our nation as I drive our truck and our RV, and I do NOT want our services reduced! If this should happen it will indicate to me that my representation in the law making process is not what I want it to be. That will greatly influence the way my family and I cast our future votes.

Sincerely,

Jo Green
